Application No.: 10-2001-0085041

Title of the Invention: Organic dye molecules and nonlinear optical polymeric compounds
containing chromophores

According to Article 63 of the Korean Patent Law, the applicant is notified that the present application has been rejected for the reasons given below. Any Argument or Amendment which the applicant may wish to submit, must be submitted by March 30, 2004. An indefinite number of one-month extensions in the period for submitting a response may be obtained upon request, however no official confirmation of the acceptance of a request for an extension will be issued.

Reasons

The invention as recited in claims 1, 3, 4, 6, 8 through 10 could have been easily invented by one of ordinary skill in the art prior to the filing of the application, and thus this application is rejected according to Article 29(2) of the Korean Patent Law for the following reasons.

The invention as recited in claims 1, 3, 4, 6 8 through 10 relates to organic dye molecules and nonlinear optical polymeric compounds containing chromophores. However, Korean Patent No. 169910 (October 13, 1998) that was published prior to the filing date of this application discloses nonlinear optical polyimide compounds represented by Formula (2). There are no specific differences between the two inventions in terms of the molecular structure of a compound and acting effect. Therefore, one of ordinary skill in the art could easily invent the subject matter of the invention from the cited reference, and thus, this application cannot be patented as it does not satisfy the requirement of Korean Patent Law Art. 29(2).
